

User Display Board for CD-Pro2LF

Dimensions: 228.44 x82.00 mm (including keyboard)
Weight: 132 gr. (including keyboard)

Overview

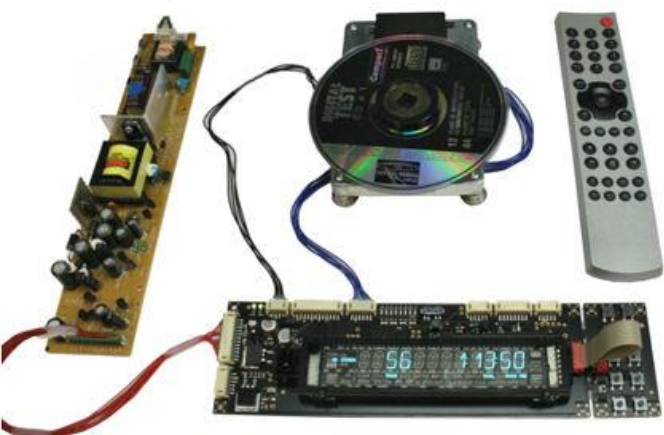

To minimize the development time and budget, Audiocdpro proposes a complete user interface board for the CD-Pro2LF. All components of the Display Kit are already soldered on-board: display, display driver, filament driver, user microcontroller (which includes the user firmware) and the Infra-Red receiver. You can control your player thanks to the detachable keyboard or the remote control handset.

CD-Pro2LF/Display Board package includes:

- CD-Pro2LF with mechanical kit
- User Display Board with keyboard
- Remote control Handset
- PSU
- Cables
- CD-ROM including all the technical specifications

Specifications

- Complete user interface (hardware + software) for control of audio applications based on the CD-Pro2LF
- User firmware included Free Of Charge
- Customizable keypad with the possibility to change the allocation of the key
- Several dimming steps for display luminance
- High brightness with clear contrast of the display
- Many colors available thanks to additional color filters
- Ready-to-use display board for mass production
- Mounting holes for direct implementation of the display board in final design
- Many colors available thanks to additional color filters
- Detachable Keyboard
- Excellent reliability
- RoHS compliant

Audiocdpro is an e-commerce website whose main target is to make accessible to a large audience the most specialized audio components used in the high-end audio market. These components have often been used in state-of-the-art audio equipments.

Thanks to **Audiocdpro**, these prestigious audio parts are now available in very flexible quantities!
